

THE TOP 10 BARRIERS TO STUDENT SUCCESS

We surveyed education professionals - from Pre-K to Higher Education - to find out what they consider to be the biggest barrier to student success.

Here are the top 10 barriers respondents identified.

HALF

of the survey respondents find that students are lacking organizational skills or at-home support

Students are lacking...

23%

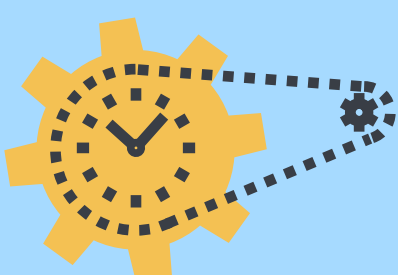

of educators agree that a lack of organization is the biggest barrier to student success

20%

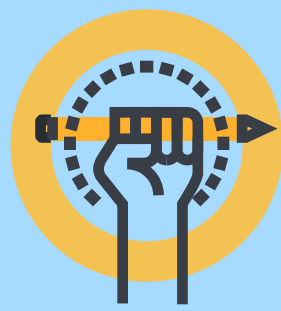

of professionals across the education industry attribute a lack of at-home support as a negative factor that impedes a student's ability to achieve academic success

Unlucky Number 7

7%

of educators recognize poor time management as a reason why students don't succeed

7%

find a lack of motivation to be a hurdle on the track to student success

Poverty and underdeveloped skills

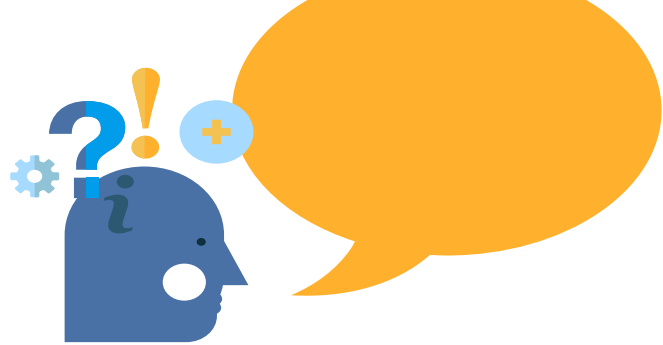

6 in every 100 educators

believe either poverty or underdeveloped skills set students up for failure when it comes time to succeed

Behavioral issues

5%

of professionals believe that behavioral issues are an underlying issue as to why students are unable to succeed

Final 3:

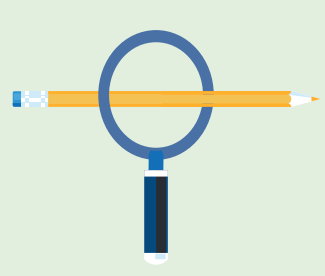

Rounding up the top 10 barriers: testing, media distractions, and class sizes each account for 4% of total survey responses

Testing

Media Distractions

Class Sizes

How to contribute to success

1. FOCUS

Dig deep into school culture and analyze the factors that contribute to both its negatives and positives

2. EXPLORE

This survey indicates a variety of reasons and circumstances impede success - explore all elements

3. INVOLVE

Take a roll call of all your stakeholders including students, parents, faculty, staff, board members, and community leaders
